Professional Summary

Full-Stack Developer with 2.5+ years of experience in Laravel, React JS, Node.js, Express.js, and Angular. Experienced in building and maintaining RESTful APIs, implementing JWT-based authentication, Service Layer Architecture, WebSocket integrations, and Async Queue processing including GenAI microservice development and LLM agent integration using FastAPI, Google Gemini API, and DeepSeek AI. Proven track record of delivering scalable web solutions in fast-paced production environments with measurable performance improvements.

Technical Skills

Languages: PHP, TypeScript, JavaScript, Python, Go

Frameworks & Libraries: Laravel, React (Redux), Node.js, Express.js, Angular, FastAPI, Next.js, TailwindCSS, n8n, Playwright, ShadCN

Databases: MySQL, MongoDB, PostgreSQL, Redis

Tools & Platforms: Git, GitHub, Docker, Postman, GitKraken, Hoppscotch

AI & Integrations: LLM Agent Development, RAG, LangChain, Google Gemini API, DeepSeek AI, MSG91 WhatsApp API, Razorpay, Stripe

Concepts: REST API Design, WebSockets, Service Layer Architecture, JWT Authentication, RBAC, Async Queues & Jobs, CI/CD, Payment Gateway Integration

Work Experience

FullStack Engineer | Remedio Technologies, Kolkata

Dec 2025 – Present

- Extended a Laravel and Node.js/Angular.js e-commerce platform with shipment dispatching, stock verification, and CRM Webhook integrations, improving lead generation pipeline efficiency.
- Implemented JWT-based user authentication and Role-Based Authorization (RBAC) across multiple REST API services, strengthening application security.
- Optimized Angular and React.js application load times by up to **70%** through front-end performance tuning and elimination of code duplication.
- Built a GenAI microservice using FastAPI and Google Gemini API, integrated into a Laravel + Amazon S3 ERP system for automated product visualization.
- Designed and built an LLM agent with DeepSeek AI into an in-house chat application, enabling automated conversational workflows.
- Integrated MSG91 for WhatsApp campaign messaging, enabling automated customer outreach and notification workflows.

Junior Software Development Engineer | Digital Aptech, Kolkata

Mar 2024 – Nov 2025

- Developed and maintained RESTful APIs using Laravel for an e-commerce shipping platform, implementing Eloquent ORM relationships, custom middleware, and Form Request validation.
- Contributed to a React and Node.js e-commerce platform, handling feature development, bug fixes, and backend service improvements.
- Applied Service Layer Architecture to separate business logic from controllers, improving code maintainability and scalability.
- Used Laravel Queues and Jobs for asynchronous shipment processing, increasing system throughput and reliability.
- Built custom WordPress themes and plugins using Figma references, integrated WooCommerce, and implemented Razorpay and Stripe payment gateways.

Projects

No Yes-Man – Next.js, React JS, Gemini, DeepSeek, PostgreSQL | no-yesman.vercel.app

- AI content pipeline where two LLM models fact-check and debate each other's outputs before delivering a verified response — built to eliminate single-model bias.

California Housing Predictor – React JS, FastAPI, HuggingFace, scikit-learn | github.com/suborno251

- ML-powered housing price prediction app with a React JS frontend and FastAPI backend, trained on the California Housing dataset.

Education

Bachelor of Science in Computer and IT Technology (B.Sc.) | City College, Kolkata

Mar 2019 – Dec 2022
